CORE PRINCIPLES

Child-Centered Learning
We place our students at the center of everything we do. We design our programs and resources to be tailored to the unique needs, interests, and abilities of each ninja.

Experiential Learning
We emphasize learning through hands-on experiences in real-world contexts, whether it's by doing, failing, or experimenting.

Inclusivity
We value inclusivity above all else - ensuring all our programs and resources are accessible and welcoming to children of all backgrounds, abilities, and identities.

Creativity
We believe that creativity allows and encourages our ninjas to explore their imaginations and develop innovative solutions to problems through coding.

Collaborative Learning
We believe that collaborative learning fosters a sense of community among our ninjas, educators, and parents. This collaborative learning encourages sharing, feedback, and mutual support.

Growth Mindset
We believe that the best learning environment is one that meets our students where they are and challenges them through the importance of persistence, resilience, and a willingness to take on challenges in the pursuit of learning.

Fun
We believe that fun is the outcome of using interactive and engaging technology and teaching methods to teach coding in an enjoyable and motivating environment for our ninjas.

MISSION

Our mission is to empower tomorrow's innovators to thrive in a digital future through fun, immersive environments. We foster creativity and curiosity to help create the problem-solvers of tomorrow.

We are the accessible and engaging Coding Dojo that provides your child with the tools and resources necessary to feel empowered to accomplish their dreams.

Our immersive environments are accessible and inclusive, ensuring all our students have access to our high-quality coding education. We believe in utilizing cutting-edge technology to break down education barriers in order to provide opportunities for all our students to learn and succeed.

Our nearly 400 Global Dojos are staples in the community, fostering collaboration and support among students, educators, and parents.

VISION

A world where kids write the code

What does a world look like where kids write the code?

1. Creative and innovation solutions to the world's biggest problems.
2. Shaping their own personalized education and learning environments.
3. Continue to prioritize diversity and inclusion, leading to a more representative world.
4. Interactive and playful technology.
5. Communication and interaction with the world through intuitive, fun, and safe social media.

Innovative.
Creative.
Playful.

OUR JOURNEY TO NOW

2016

David Graham, a software developer and entrepreneur, founds Code Ninjas in Pearland, Texas.

2017

Code Ninjas launches its first franchise location in Missouri City, Texas.

2018

Code Ninjas opens its 50th location in San Diego, California.

2019

Code Ninjas expands internationally with the opening of its first location in Canada.

2020

Despite the COVID-19 pandemic, Code Ninjas continues to grow under the leadership of new CEO Justin Nihiser.

Opens its 200th location in Sugar Land, Texas.

2021

Code Ninjas continues to expand its footprint with new locations opening in the United States, Canada, and United Kingdom.

2022

Code Ninjas partners with Microsoft MakeCode and Launches IMPACT, its own propriety learning platform

BRAND CHARACTERISTICS

Respect

Perseverance

Continuous Learning

Focus

Community

OUR CULTURE

To Our Franchisees

The Code Ninjas Brand represents the potential and opportunity to have an immediate positive influence on the futures of the students in their communities.

That opportunity is maximized when the Dojos are full, the focus is on building community, and parents see the positive change in their child's lives.

Our Franchisees are Parents, Tech Professionals, Entrepreneurs, Business Professionals, Teachers and everything in between. The diversity of our Franchisees is the strength of the Code Ninjas Brand.

To Our Parents

To our Parents, Code Ninjas is the perfect balance between hard skills and soft skills - immediate results, with long-term results.

Code Ninjas, at its core, equips our students with the tools to succeed in their future -- whether or not that future is in coding. We use coding as the medium through which we teach the soft skill development students are not getting in traditional education.

Our Parents see improvements in their child's logical thinking and problem-solving, creativity, persistence and resilience, collaboration and communication, attention to detail, and more.

Code Ninjas uses coding as a fun and engaging way to help our students build a wide range of hard and soft skills that will serve them well in their futures.

OUR CULTURE

To Our Ninjas

The culture that our Franchisees build in their Dojo means that our students have to be dragged out by their parents -- they LOVE Code Ninjas because we provide them with a sense of belonging, positive social interactions, exposure to diversity, learning opportunities they can't get anywhere else, and exposure to positive role models.

Sense of Belonging

Our students are a part of something larger than themselves and they feel that interconnectedness every time they step foot in our Dojos.

Positive Social Interactions

Our students are surrounded by like-minded peers, which allows them to develop social skills and receive emotional support to aid in their overall development.

Exposure to Diversity

Our dojos are cultural melting pots - not just in different backgrounds and cultures, but in diversity of thought. All of which lead to more open-minded and accepting perspective on the world.

Learning opportunities

The education resources that we provide mean that our students have access to a learning method, IMPACT, that only we provide.

Role models

Our Franchisees, Center Directors, and Senseis care about our students more than anything else, and our students can feel this -- that inspiration drives them to work harder and achieve more than they ever thought possible.

TONE OF VOICE

Approachable.
Engaging.
Informative.

To Our Ninjas, we are Positive, Encouraging, and Engaging.

- We are constantly reinforcing the idea that coding is fun, approachable, and achievable.

To Our Parents, we are Approachable, Informative, and Supportive.

- We stress that coding is the medium through which we teach life skills such as creativity, leadership, problem-solving, and community.
- We recognize that the majority of our parents do not have a technical background and thus can be intimidated by something they are not familiar with.
- Trust is paramount. Trust that we know what we are doing. Trust that we are teaching in a safe and inclusive environment. Trust that their child is going to get the attention they deserve. Trust that their child is supported in everything they wish to explore and learn.

OUR LINGO

Ninjas

"Ninjas" are the students who are enrolled in our coding programs. The term is used to evoke the idea of mastery and skill, much like the legendary Japanese warriors known as ninjas.

The Code Ninjas curriculum is designed to teach students coding skills through building video games and other interactive projects. The program is broken down into various belt levels, similar to the martial arts, with each level building upon the skills learned in the previous level.

As students progress through the program, they earn different colored belts, with the highest level being the coveted black belt. Along the way, they also earn badges and rewards for completing projects and demonstrating mastery of various coding skills.

The term "Ninjas" is used to create a fun and engaging atmosphere that encourages students to embrace their inner creativity and build valuable skills. It also emphasizes the idea of continuous learning and improvement, as students work towards mastering new coding concepts and techniques.

Code Sensei

Code Senseis are trained and experienced mentors who guide students through the process of learning to code. They are responsible for creating a fun and engaging learning environment for students, while also providing personalized instruction and support.

The Code Sensei use a variety of teaching methods to help students learn coding skills, including individualized instruction, group projects, and game-based learning. They are also trained to use the Code Ninjas curriculum, which is designed to teach coding concepts through building video games and other interactive projects.

Code Sensei are typically experienced coders themselves, with a passion for teaching and mentoring young people. They undergo rigorous training to ensure they are equipped to provide the best possible instruction and support to students.

Overall, Code Sensei are an integral part of the Code Ninjas experience, providing guidance and support to students as they learn valuable coding skills and work towards becoming confident, creative coders.

Dojo

Dojo is the classroom where students attend coding classes and work on their projects. It is designed to be a fun and engaging learning environment that encourages creativity, exploration, and collaboration.

The Code Ninjas Dojo is equipped with state-of-the-art technology and resources, including computers, software, and other tools that students use to build video games and other interactive projects. The Dojo is also staffed with experienced Code Sensei mentors who provide personalized instruction and support to help students master coding skills.

The Dojo is divided into different areas, each designed for specific purposes. For example, there may be a coding area where students work on individual projects, a collaboration area where they work on group projects, and a workshop for STEM activities such as 3D printing and physical computing.

Overall, the Code Ninjas Dojo is a dynamic and engaging space where students can immerse themselves in the world of coding and work towards becoming confident, creative coders.

OUR VISUAL IDENTITY

BRAND IDENTITY

At Code Ninjas, we understand that our logo is the touchstone of our brand and one of our most valuable assets. As such, it's important to maintain the integrity of the logo and adhere to our brand guidelines. This means that the position, size, color, and spatial and proportional relationships of the primary Code Ninjas logo elements should not be altered.

Our logo consists of two components—the ninja head symbol and the logo type. There are two official configurations of the logo: the stacked logo, which features the ninja symbol above the logo type, and the one-line version, which places the ninja symbol to the left of the logotype. While the logo can be proportionally scaled, it must not be used smaller than the minimum permitted size, as referenced on the next page.

Whenever possible, the logo should be used in its color format. We do offer grayscale and reversed-out versions of the logo for situations where the color logo is not possible or appropriate.

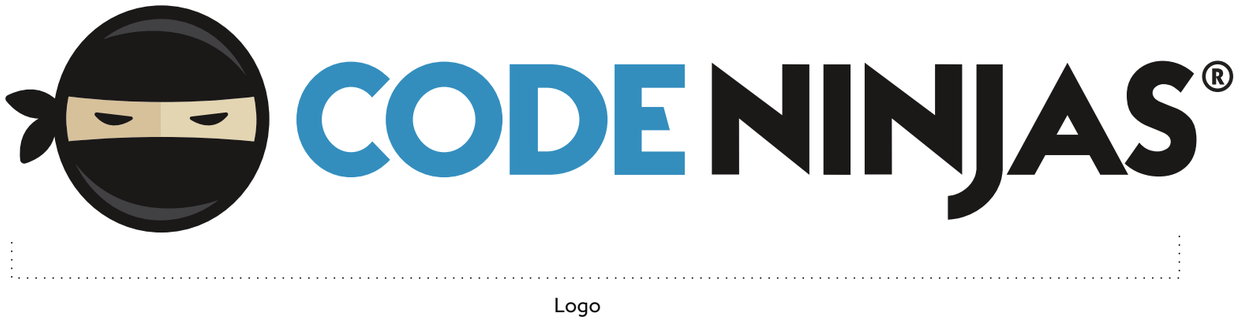

Overall, it's important to remember that our logo represents our brand and should be used consistently across all communications and platforms. The logo must be used exactly as provided in the two configurations on this page. Any variance must be approved by the Home Office. By adhering to our brand guidelines, we can ensure that our brand remains strong and recognizable to our customers and stakeholders.

TRADEMARK GUIDANCE

Code Ninjas Trademark Usage Guide

As a registered trademark, "Code Ninjas" and its associated logos, slogans, and marks represent our identity and are a promise of quality to our clients. As such, they should be used correctly and consistently by anyone producing communications for Code Ninjas.

1. Trademark Acknowledgment
Every use of the Code Ninjas trademarks should be acknowledged with the symbol ™ for unregistered trademarks or ® for registered ones, in superscript. The symbol should be placed immediately after the trademark, in the upper right corner.
Example: Code Ninjas®

2. Correct Use of Trademark
Always use the full, correct trademark. Do not alter or abbreviate it. For example, never change "Code Ninjas" to "C.Ninjas" or "CodeN".

3. Trademark Distinguishing
When using the trademark in a body of text, it's recommended to set it apart and distinguish it from other words. This could be achieved by capitalization, bolding, italicizing, or placing it in quotes. Example: Join the **Code Ninjas**® today and boost your coding skills

4. Prohibited Uses
Do not use the Code Ninjas trademark or any confusingly similar marks as a part of your company name, product name, domain name, or social media profile.

5. Avoiding Genericide
Always use our trademark as an adjective, never as a noun or verb. It should be followed by a generic term such as "program" or "course".
Correct: Join the Code Ninjas® program today.
Incorrect: Join Code Ninjas® today.

6. Non-Endorsement
Do not use the Code Ninjas trademark in a way that would imply the company's endorsement or sponsorship of a third-party product or service without express written consent.

7. Use in Marketing and Advertising
When used in marketing and advertising materials, the trademark should be clearly and prominently displayed. Any use must not be deceptive, misleading, or likely to cause confusion about the ownership of the trademark.

This guide serves to provide a basic understanding of our trademark usage rules, but it is not exhaustive. For further information or clarification, please contact the Code Ninjas legal department.

.

CLEAR SPACE

Exclusion Zones

To ensure that the logo stands out in all communications, it should be surrounded on all sides by clear space. Exclusion zones are minimum clear spaces indicated around the Code Ninjas logo that images and other graphic elements should not impede when the logo is applied to artwork and other materials.

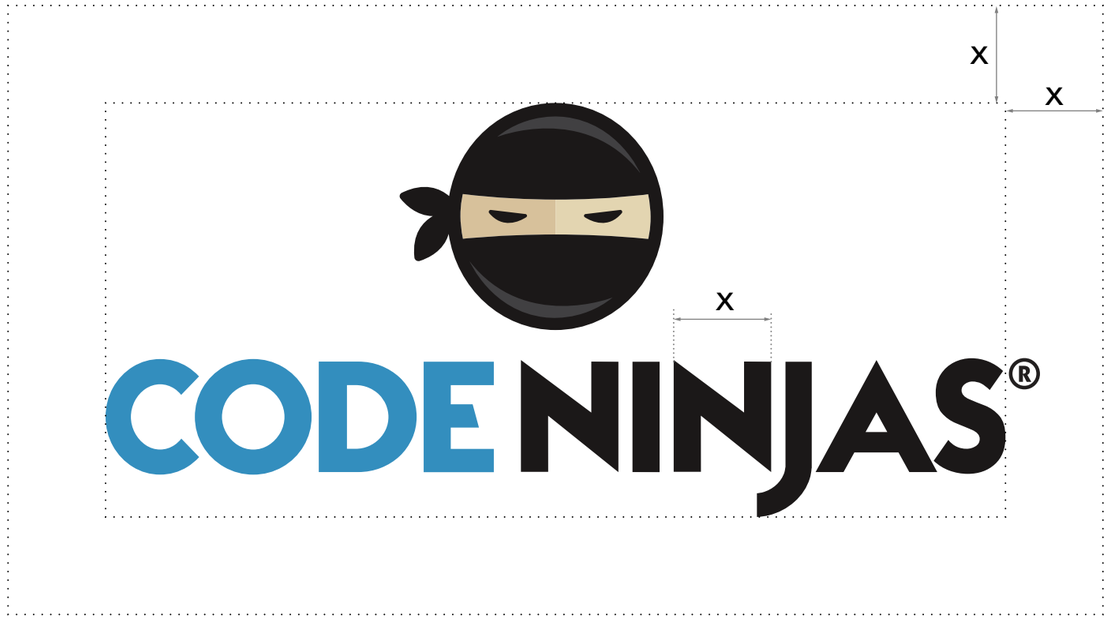

Sizing

The logo should not be stretched. When resizing, ensure that the aspect ratios remain the same, so the image is not skewed out of proportion. The logo should not be smaller than 1″ in width.

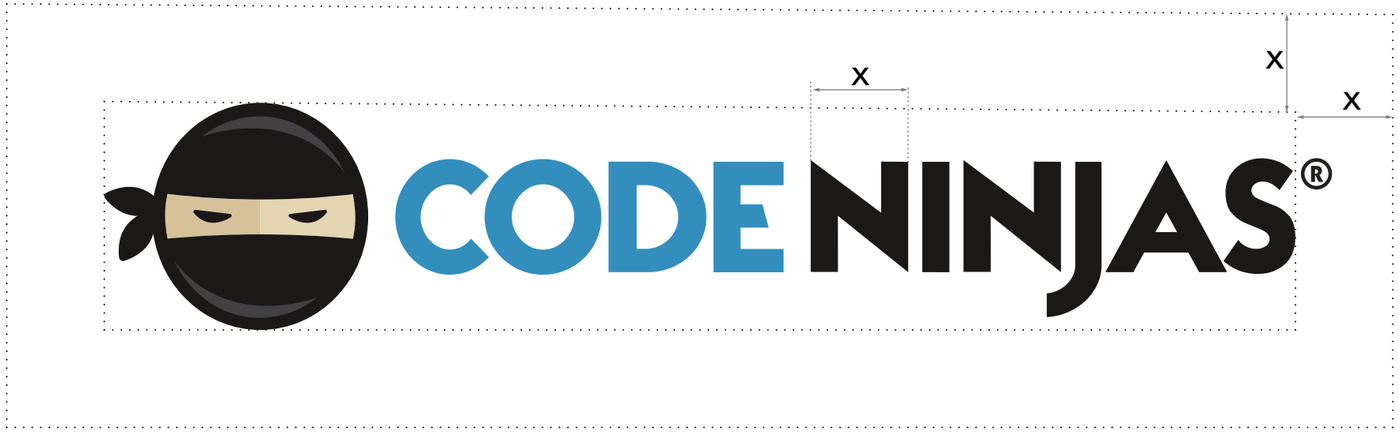

Positioning

Do not alter the scale or positioning of the elements within the logo.

Stacked Logo

One Line Logo

LOGO COLORS

CODE NINJAS®

Hex Code	#000000	#424244	#d7c19b	#e3d5b1	#338fbf

COLOR VARIATIONS

Five variations of the brand mark have been specially designed to enable flexibility in accommodating both the printing process and appearance in digital environments.

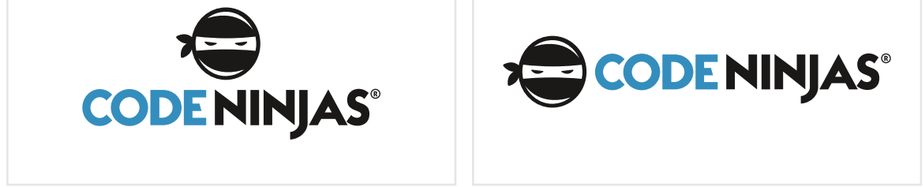

Full Color
Suitable for full color printing and use in digital environment

Full Color with Outline
Suitable for full color printing and digital use. This logo is for use on photographic images or dark backgrounds. Never place the logo on visually cluttered images.

Two Colors
Suitable for two spot color printing . Not recommended for use in digital environment.

One Color
Suitable for one spot color printing . Not recommended for use in digital environment.

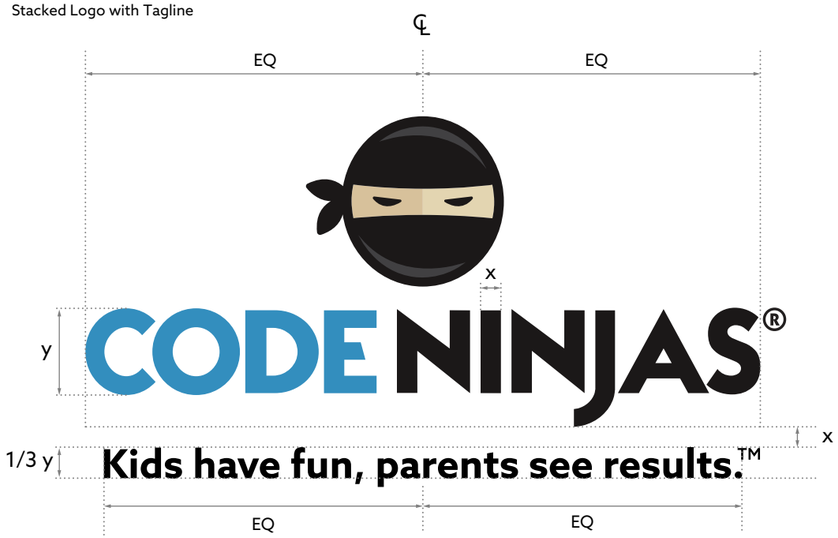

Inversed One Color
Suitable for one spot color printing on dark background. Not recommended for use in digital environment.

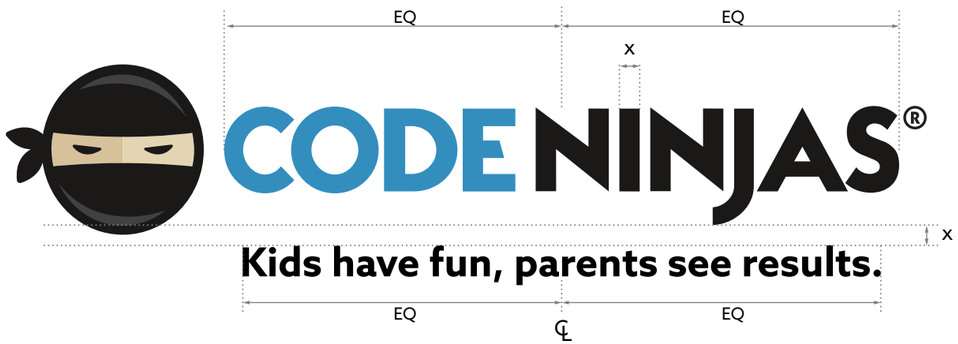

LOGO WITH TAGLINE

When using a tagline in conjunction with the Code Ninjas logo, it's important to ensure that the tagline doesn't overpower the logo. Specifically, the height of the letters in the tagline should be between 1/3 and 1/2 of the height of the letters in "CODE NINJAS". Moreover, the tagline should be centered horizontally with respect to the words "CODE NINJAS", excluding the ninja head and any trademark or registration marks. To maintain visual balance, the tagline should have a minimum distance from the Code Ninjas logo, as indicated by the "X" on the right diagram. Additionally, the tagline should be written in sentence case with complete punctuation.

Stacked Logo with Tagline

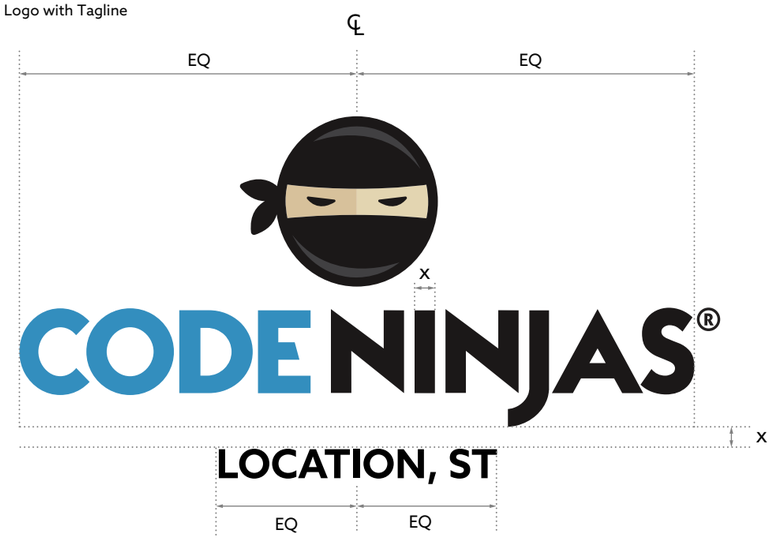

One Line Logo with Tagline

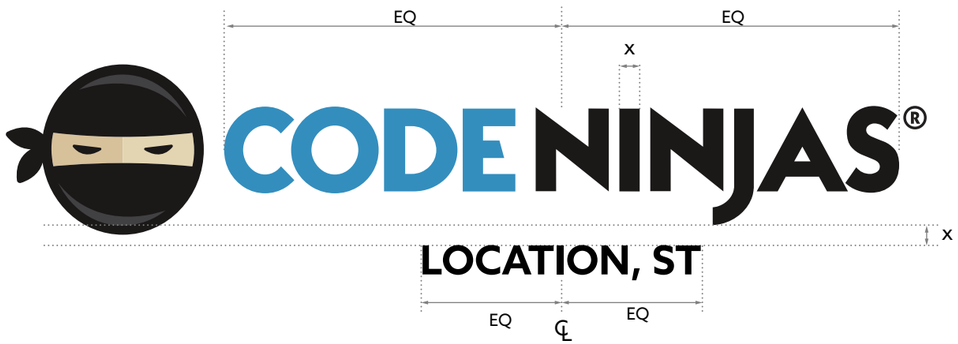

LOGO WITH LOCATION SLUG

When using a location slug with the Code Ninjas logo, make sure that the letters in the location name do not overpower the letters in the logo itself. The height of the tagline letters should be between 1/3 and 1/2 of the height of the letters in "CODE NINJAS." Center the text horizontally with respect to the words "CODE NINJAS," excluding the ninja head and any trademark or registration marks. To maintain visual balance, the tagline should have a minimum distance from the Code Ninjas logo, as indicated by the "X" on the right diagram. The location should be written in all caps, with a comma separating the location name and the state.

Stacked Logo with Tagline

One Line Logo with Tagline

PROPER & IMPROPER USAGE

The Code Ninjas logo has been designed to ensure optimal results when reproducing it at a variety of sizes across different types of media. Use the logo according to the specifications in these guidelines.

Improper use of the logo diminishes the impact of the brand identity. Take care to avoid the possible misuses of the Code Ninjas logo as shown here. The only acceptable alteration of the logo is increasing or decreasing its size through proportional scaling of the original vector artwork. The following examples apply to all logo versions.

- **Do not alter the brand name or the logo in any way.**
- **Do not combine the brand name or the logo with other businesses, entities, or programs.**
- **Do not use the brand name or the logo in any way that mischaracterizes the relationship between you and Code Ninjas, or between Code Ninjas and other businesses or entities.**

Don't stretch the logo

Don't apply shadows or gradient that reduce the contrast between the logo and background.

Don't alter the ninja head symbol or the logo type.

Don't place the logo over complex, busy imagery or dark background colors that diminish the clarity of the logo.

Don't alter the porportions between the logo elements

Don't change any of the colors in the logo

Do use the outline version when used on top of dark or photographic images

Do use the single color logos over photographic imageries

Do use the white logo with a blue or dark background that would otherwise make the standard logo difficult to see.

TYPOGRAPHY

Azo Sans Font family

Azo Sans typeface has been selected for use in our corporate and marketing communications. You can choose from five (5) different weights of Azo Sans to create a clear and consistent visual hierarchy. By using type effectively, you can draw readers' attention, highlight the most important information, and maintain a sense of clarity, order, legibility, and structure in your written communication.

Replacement Fonts For Common Usage

If Azo Sans is not installed on your computer, please use the following substitute fonts for common usage. Arial is the default font to use when Azo Sans is unavailable.

BELT COLORS

The Code Ninjas belt system is a way to recognize and reward ninjas' progress and achievements in coding. The system is inspired by martial arts and has nine colored belts that signify a student's level of proficiency. Each belt represents a different set of skills and knowledge that the student has acquired, and as they progress through the system, they will continue to build on their coding abilities. The belts are not just a symbol of accomplishment, but also serve as a motivator for ninjas to strive for excellence and to continue learning and growing in their coding journey.

NINJA MASCOTS

Code Ninjas' mascots are an essential component of our brand identity, serving as powerful visual assets that help us tell our story and showcase the exciting and engaging learning experiences we offer. These mascots embody our company culture and values, representing our commitment to inclusivity, creativity, and innovation. With their versatile and dynamic designs, they appeal to learners of all ages and backgrounds, making them a valuable tool in communicating our message to a broad audience. Whether in print, digital, or physical mediums, our mascots are an integral part of the Code Ninjas brand, and we are proud to feature them in all of our communications. Ninja mascots in various poses and belts are available on Canva.

CANVA LINK

Recommended Body to Head Proportions

JR, White to Orange Belts
Body Height ≈ 2 1/8 Heads

Green to Purple Belts
Body Height ≈ 2 3/8 Heads

Green to Purple Belts
Body Height ≈ 2 1/2 Heads

PHOTOGRAPHIC IMAGERY

Our photography style is characterized by its fun and approachable nature, which reflects the excitement and enjoyment that our ninjas experience during their learning journey. At Code Ninjas, we celebrate diversity and inclusivity, and we strive to showcase this in our photographs by featuring children and senseis from different backgrounds.

Structure

A good photo relies on the right balance of contrast, color, composition, and shapes.

Lighting

Lighting is fundamental, as it brings emphasis to key elements in a photo. Avoid using photos with dull lighting and colors, as they create emotions against the brand.

Lack of Clutter

The work area needs to portray a clean and safe work environment, free of clutter (i.e., food or drinks on a desk, messy wire and cables and dirty uniforms).

CANVA LINK

ANIMATION & VIDEO STYLES

Similar to our photography style, our aim for our videos is to showcase the excitement and enjoyment of our ninjas' learning experiences. Our videos should be fast-paced and energetic, with vibrant graphics and catchy music. To keep the viewer engaged, we use animations, colorful backgrounds, and dynamic transitions.

Opening/Closing Logo Usage

For opening titles, we recommend using either white or Code Ninja Blue text with our approved corporate font. The closing of the video should include the Code Ninjas logo and copyright information.

Style/Tone

Our videos should reflect the personality and values of our brand. Scripts and storylines should incorporate our brand's mission and value proposition and end with a clear call to action. Animations should be playful, energetic, and engaging.

Typography

While videos and animations offer more creative flexibility than print, we maintain consistency across all mediums through the use of our corporate typeface. Therefore, only the Azo Sans font family should be used for key messaging incorporated in main call-outs or on-screen text.

Sound

To ensure a professional sound quality, voice-overs should be recorded, edited, and mastered in an audio recording studio by a professional voice talent.

All external-facing videos must go through legal and branding approval before release. To avoid costly redo's, please consult with Corporate Marketing in the storyboard phase to ensure brand alignment.

CODE NINJAS®

VISUAL CONTENT PROPER & IMPROPER USAGE

DOS

- DO use images that reflect our playful brand personality.
- DO show real ninjas and senseis in our Dojo
- DO show collaboration between ninjas, senseis wherever possible.
- DO show the exciting, proud moments and natural interactions
- DO show photos that reflect the diversity of our ninjas and staffs.

As a general rule, you should always get prior permission from parents to use photos of their children in your marketing and social media efforts. The best time to secure this permission is at the time of customer sign-up.

Please consult your lawyer to ensure that you are following all applicable laws, including the use of a written photo release form.

DO NOTS

Here are examples of imagery that do not represent the Code Ninjas brand. Our photography should never be artificial, stereotypical, decorative, outdated, generic, cluttered, or unnatural.

IN GENERAL

DO NOT use imagery that infringes on copyright laws

DO NOT use imagery that violates our health and safety procedures

DO NOT use imagery with content that is irrelevant to our business and customers

DO NOT use imagery that exposes confidential information such as Wi-Fi passwords or personal information

DO NOT show imagery that displays insulting, offensive, or distasteful messaging

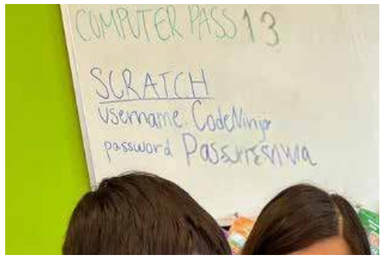

Outdated equipments

Wrong age

Wrong setting

Exposed confidential information

Irrelevant subject

Stereotypical

Copyright violation

Unnatural

Cluttered

CODE NINJAS®

PROGRAMS

Code Ninjas' core programs are represented by color-coded organic abstract shapes called program medallions. These medallions consist of the abstraction of the letter acronyms of the programs' names, and each one has its own distinctive shape.

The Create program medallion is in shades of blue, which signifies intelligence, commitment, and trust. The Camps program medallion is in shades of green and turquoise, representing growth, enhancement, and summertime, when most camps take place. The Junior program medallion is in shades of purple, symbolizing creativity, playfulness, and youth.

When designing with the program medallions, if the medallions are larger than 1 inch in height, use the medallions with the Code Ninjas logo. This creates a lockup that presents the Code Ninjas brand without needing to be presented separately in a design.

If the medallion is smaller than 1 inch in height, choose the shorthand version without the Code Ninjas logo. However, the Code Ninjas logo must be present in another location in the design.

To ensure consistency across all marketing materials, here are some usage guidelines:

- The program medallions should be used to represent the respective programs and should not be altered or modified in any way.
- The colors used in designs should adhere to the approved color palettes for each program medallion.
- The program names within the medallion should always be in all caps and use the brand font, Azo Sans Black.
- The most current medallions are availble on Canva under the Brand Kit.

IMPACT

IMPACT is Code Ninja's proprietary coding education platform supporting the core programs. Developed in partnership with Microsoft MakeCode, the IMPACT learning platform empowers kids with a curriculum that extends beyond traditional coding education. It offers carefully curated projects and activities designed to foster creativity, critical thinking, and collaboration. Powerful learning algorithms assess each child's needs, creating a personalized learning path tailored to their interests. This approach ensures that kids are consistently challenged, engaged, and enjoying themselves while learning.

Furthermore, our curriculum is designed to align with internationally recognized standards. Our programs follow the Computer Science Teachers Association (CSTA) standards in the United States. In Canada, our curriculum closely resembles the CSTA CS Standards being developed by Canada Learning Code. Additionally, CREATE aligns with the National Curriculum for computing programs of study in England. These alignments ensure that our students receive a comprehensive and relevant education that caters to the specific needs of their region.

IMPACT BRANDING

CODE NINJAS CREATE

CREATE is one of Code Ninjas' core programs designed for kids aged 8 to 14. In Code Ninjas CREATE, kids have a blast building incredible video games and developing ninja coding skills, progressing from white to black belt.

Code Ninjas Create provides a safe and encouraging environment for kids to learn coding. Their journey in learning block coding, JavaScript, and C# is guided by our helpful Code Sensei every step of the way. The Create program's schedule is also flexible to accommodate the busy lifestyles of modern families. Parents can schedule dojo sessions at their convenience, either on weekdays after school or during weekend hours for students.

With Code Ninjas CREATE, kids embark on an exciting coding adventure that not only equips them with technical skills but also nurtures their creativity and problem-solving abilities. Whether they dream of creating the next hit game or aspire to be coding wizards, CREATE sets them on the path to success with a fun and enriching learning experience.

CODE NINJAS CAMPS

Code Ninjas CAMPS transforms children's tech interests into an exhilarating learning adventure. Designed for kids ages 5-14 to fill the learning void during school breaks, Code Ninjas Camps offer an array of 20+ captivating experiences in STEM, tech, gaming, and coding-related activities. From delving into the virtual realms of Minecraft and Roblox to mastering game building, modding, robotics, physical computing, 3D design and printing, and video production, our camps cater to young tech enthusiasts seeking immersive, hands-on learning.

Join the Code Ninjas community during school breaks and unlock the potential of valuable tech skills. With a focus on blending fun and education, Code Ninjas Camps turn learning into an unforgettable journey, empowering participants with a vast array of engaging tech experiences that foster creativity and innovation.

CODE NINJAS®

CODE NINJAS JR

Code Ninjas JR is a program specially designed for young learners, ages 5-7, aiming to lay a strong foundation of critical thinking and problem-solving skills through a fun and engaging hands-on STEM-based curriculum. With a focus on creativity and playfulness, JR introduces young ninjas to coding through a series of creative and exploratory activities. Utilizing graphical block-based coding environments tailored for pre/beginning readers, this program strikes a perfect balance between coding on a device and incorporating screen-free "unplugged" activities like robotics and circuits. Young ninjas get the chance to unleash their imagination as they create games, tell stories, solve problems, and much more. Along this exciting journey, they also build and strengthen essential skills in collaboration, creativity, problem-solving, and critical thinking. Throughout the JR program, ninjas learn a variety of fundamental concepts, including algorithms/sequencing, loops, events and event handlers, synchronization, parallelism, conditionals, decomposition, debugging, robotics, and circuits, setting them on the path of becoming proficient and confident young coders.

CODE NINJAS®

EVENTS

In addition to the core program medallions, Code Ninjas offers additional medallions for various events. Not all centers participate in these events, but for those that do, the same basic guidelines apply to these visual identities.

The event names within the medallions should always be in all caps and use the brand font, Azo Sans Black. It's important to maintain consistency in the brand's visual identity by adhering to this guideline.

Note that users should not create these medallions themselves. The most current medallions are available on Canva under the Brand Kit.

OUR MARKETING COMMUNICATIONS

SOCIAL MEDIA

Social media is a powerful tool for sharing the mission and programs of Code Ninjas with our community. These guidelines are designed to help ensure consistency, respect, and positivity across all our social media platforms.

1. **Brand Voice:** Our social media voice is friendly, informative, and encouraging. While we want to maintain professionalism, we also want to connect with our audience on a personal level. We share the excitement and enthusiasm of our students and their accomplishments.

2. **Profile Maintenance:** Ensure all profile information, including but not limited to avatars, cover photos, descriptions, and contact details, are up-to-date and consistent with our brand guidelines.

3. **Content Creation:** Content posted on social media should reflect our core values and align with our mission. It should inspire, educate, and engage our audience. Include a mix of content types, such as updates, achievements, event announcements, educational resources, and student spotlights.

4. **Use of Visuals:** Use high-quality images and videos that adhere to our brand guidelines in terms of style and quality. Always respect copyright laws and obtain necessary permissions before sharing.

5. **Responsiveness:** Engage with comments, messages, and mentions in a timely manner. Be respectful and constructive in all Interactions.

6. **Hashtags and Mentions:** Use relevant and consistent hashtags to increase visibility and engagement. When appropriate, mention or tag relevant users.

7. **Crisis Management:** In the event of a crisis or negative publicity, refer to our crisis communication plan and consult with the appropriate internal teams before responding publicly.

8. **Privacy:** Respect the privacy of our students, parents, employees, and partners. Do not share personal or confidential information without proper consent.

9. **User-Generated Content:** When sharing user-generated content, always obtain permission from the original creator and give proper credit.

10. **Compliance:** Ensure all social media activities comply with the terms and conditions of the respective social media platform. Adhere to all relevant laws and regulations, including those related to copyright, privacy, and data protection.

For any questions or concerns about social media use, please reach out to our Social Media Department.

SOCIAL MEDIA GUIDELINES

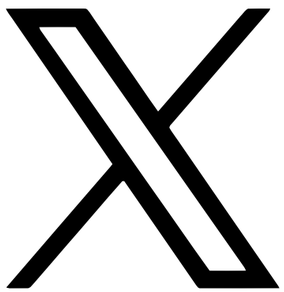

While our core brand values remain consistent, each social media channel has its own unique features and audience. It's important to adapt our communication style to each platform.

Remember, the nature and tone of content may vary between platforms, but it should always stay true to the Code Ninjas brand. Monitor performance on each platform to understand what works best for your audience and continuously optimize your strategy based on these insights.

Here are guidelines for some of the most popular platforms.

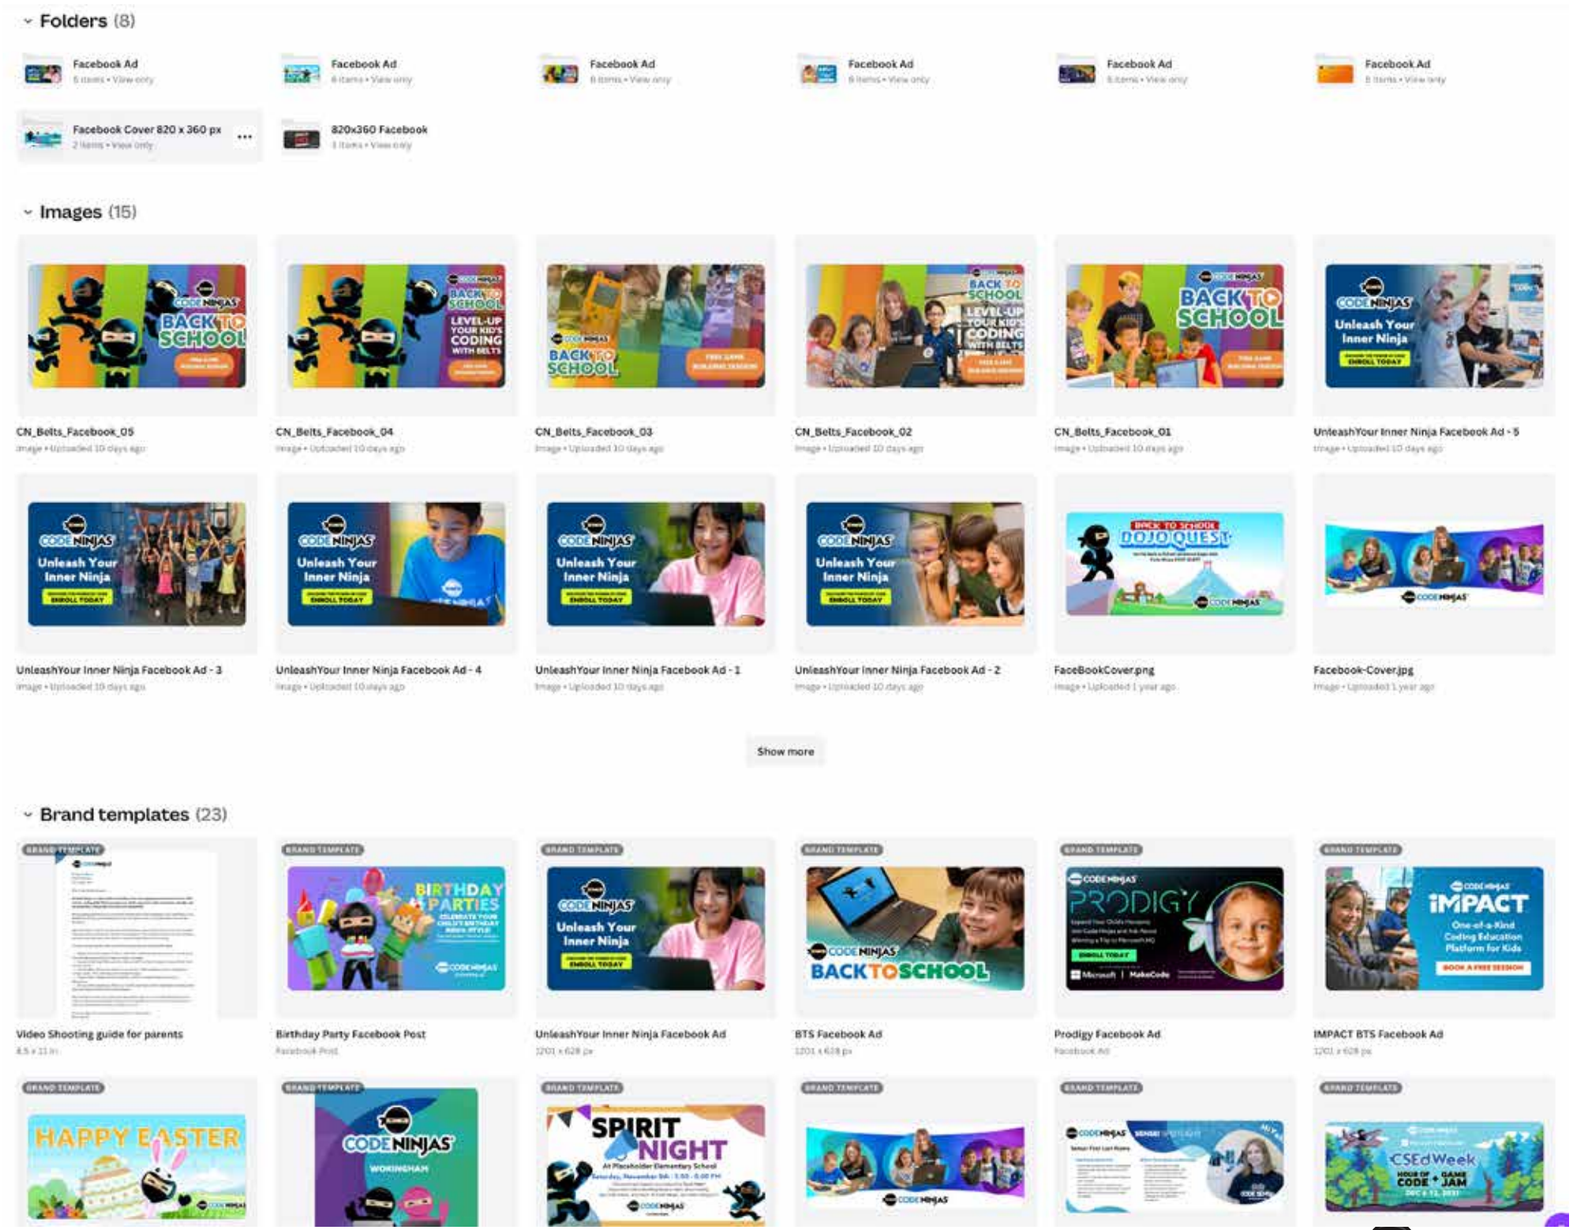

FACEBOOK

Facebook is a community-oriented platform where we can engage with parents and educators. Posts should aim to inform, inspire, and foster a sense of community.

- Share updates, news, success stories, and events.
- Use Facebook's video features to share behind-the-scenes looks, tutorials, or livestreams.
- Engage with comments and messages in a timely and respectful manner.
- Use the events feature to promote and manage upcoming events.

CANVA LINK

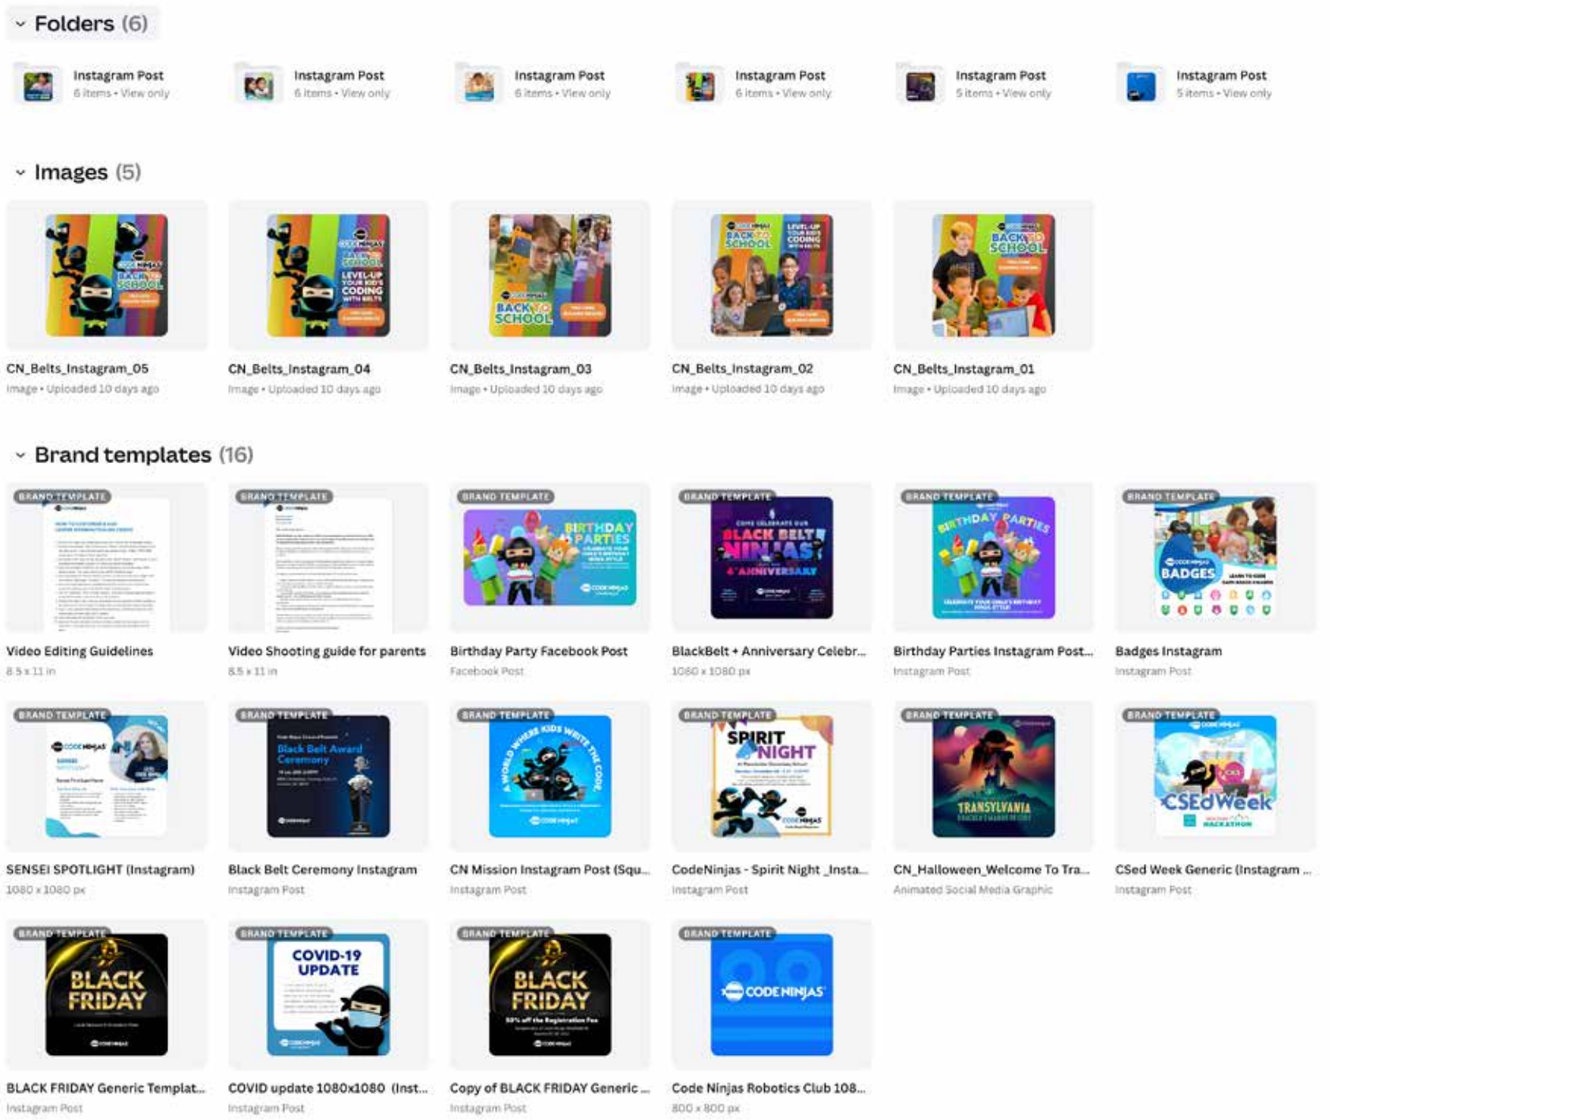

INSTAGRAM

Instagram is a visually-oriented platform that's great for reaching a younger audience, including students and parents.

- Share high-quality photos and short videos of student achievements, coding projects, events, and daily life at Code Ninjas.
- Use Instagram Stories and Reels for more informal, engaging content.
- Use relevant hashtags to increase post visibility.
- Respond to comments and direct messages in a timely manner.
- Utilize the link in bio feature to drive traffic to latest promotions, news, or events.

CANVA LINK

OTHER PLATFORMS

X, formally known as Twitter, is a fast-paced platform that's ideal for sharing news updates, engaging in relevant
conversations, and quickly responding to inquiries

- Share news, updates, and achievements.
- Participate in relevant hashtag trends or discussions.
- Engage with followers and other relevant accounts through retweets, replies, and mentions.
- Utilize Twitter polls for interactive content.

LinkedIn is a professional networking platform where we can share business updates, connect with industry peers, and attract potential employees.

- Share company news, industry-related articles, and job postings.
- Engage with other businesses and industry leaders.
- Showcase company culture and values to attract potential employees and partners.

YouTube is a video-sharing platform ideal for sharing longer, more in-depth content.

- Post educational videos, tutorials, event recaps, and student spotlights.
- Use clear, compelling titles and descriptions with relevant keywords.
- Respond to comments in a timely and respectful manner.
- Organize videos into playlists based on themes or topics.

CODE NINJAS

PRINT COLLATERAL

Code Ninja offers a variety of printed collaterals in various formats, which franchisees can customize using Canva templates. The following section showcases the main categories and sample templates, along with the link to access them. We strongly encourage the use of these templates to maintain brand consistency.

If a suitable template is not available, you may create your own design using approved graphic assets, such as the brand kit, fonts, colors, photos, and ninja imagery, in accordance with the guidelines outlined in this document. The Canva folder containing the graphic elements to create designs can be found here. If you have any questions or require approval for new designs, please send an email to marketing@codeninjas.com. You can also request assistance from Code Ninja's design team by clicking on this link.

Every Code Ninja center is eligible for an Enterprise-level Canva account, which can be shared among staff members of the center. Multiple users can log in simultaneously on desktop or mobile. To create a new account, please create a request through this link.

REQUEST FORM

You can find Code Ninjas templates by utilizing Canva's search function. Please make sure to perform the search under the "Project" tab, instead of the default "Template" tab.

In addition to using the search function, you can also browse through the content released by the Code Ninjas home office. There are two official release folders available, which are linked below.

The first folder is named "TEMPLATES" and contains customizable designs that you can use for your center. These templates are designed to be modified to fit your center's specific needs.

The second folder is named "ASSETS" and contains approved design assets and elements that you can use to create your own on-brand designs. These assets are pre-approved and ensure that your designs align with the brand's visual identity and guidelines.

POSTERS

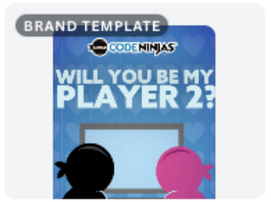

Posters are an important element in the visual identity of Code Ninjas . They serve as a powerful tool for communicating key messages, creating excitement around upcoming events, and promoting our brand. Posters should be prominently displayed in high-traffic areas of Code Ninjas centers, such as reception areas or storefront windows.

PRINT ADVERTISING

Print ads are an important component of Code Ninjas' marketing efforts, and our design team has created a range of print ad templates that align with our brand guidelines. These templates are specifically tailored to reflect our brand identity and ensure consistency across all print materials. When using our print ad templates, it's important to customize them to fit the specific needs of the project, such as sizing requirements for each publication. By using our print ad templates effectively, we can create compelling and visually appealing print ads that resonate with our target audience while maintaining consistency with our brand identity.

CODE NINJAS®

FRIENDS PASS

Friends Pass is one of our promotions that allows current students to invite their friends who are new to Code Ninjas to attend a free coding session. This promotion can be pass out at event like Parent's Night Out or Birthday parties. The goal of this promotion is to give new students an opportunity to experience our program and determine if it's right for them before committing to a full program.

HOME OFFICE UNIFORMS

Home Office Uniforms

Code Ninjas' black polo uniform is a sleek and professional way for our team members to represent our brand. The black color conveys sophistication and seriousness, while the logo embroidered at the left chest adds a touch of playfulness and creativity. The polo design is comfortable and versatile, allowing our team members to move freely while maintaining a polished look. Whether in the dojo or out in the community, our black polo uniform is a recognizable symbol of the expertise and dedication that Code Ninjas embodies.

HOME OFFICE SHARE POINT LINK

CODE SENSEI® UNIFORMS

CODE SENSEI®

The Code Sensei uniform is a recognizable and meaningful symbol of the guidance and expertise that our senseis provide to students in our dojo. The black t-shirt serves as a sleek and modern canvas for the "Code Sensei" wording on the front, which signals the level of skill and knowledge that our Senseis possess in coding and computer science. Meanwhile, the Code Ninjas logo on the back embodies the sense of community and collaborative learning that our Senseis strive to foster in our program. With the Code Sensei uniform, our instructors stand out as knowledgeable mentors and role models for aspiring young coders.

CANVA LINK

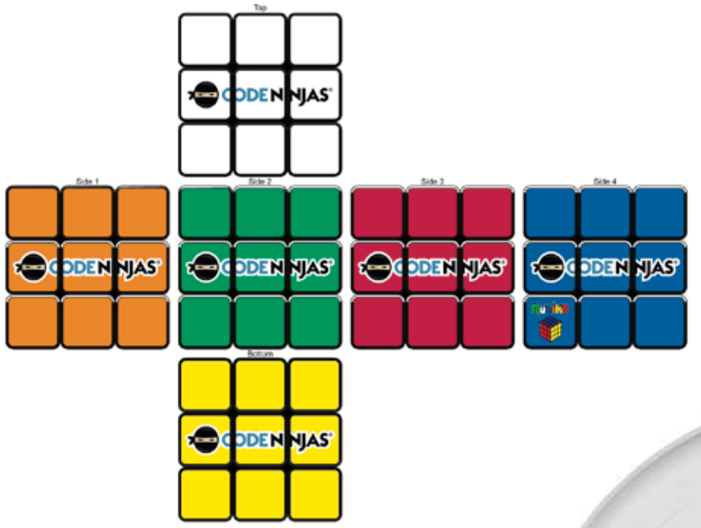

SWAGS

Swag can be a highly effective way to promote the Code Ninjas brand, as it helps to increase awareness of our business and fosters a sense of loyalty among our customers and employees.

When it comes to branding in swag, consistency is key. It's important to use the Code Ninjas logo uniformly across all swag items, regardless of their size or shape. For swag items with a larger surface area, such as banners or tot-bags, it's best to use the full-color version of the logo. However, for items with a limited color palette, such as pens or keychains, it's best to opt for the single-color version of the Code Ninjas logo. Additionally, it's important to choose either the stacked or one-line logo that best fits the form or shape of the swag item.

CODE NINJAS BRAND HUB

CODE NINJAS

VEHICLE WRAPS

Using vehicle wraps is another great way to raise awareness of the Code Ninjas brand and showcase our services. When designing a vehicle wrap, it's important to prominently feature the Code Ninjas logo and use the color palette from the Brand Hub to ensure consistency. Additionally, incorporating ninja mascots and trade dress elements like the organic waves and shapes can enhance the overall look and feel of the wrap.

Consider carefully the placement and visibility of key messaging elements such as the business name, tagline, and call-to-action to maximize their impact and effectiveness.

For assistance in creating an on-brand vehicle wrap and obtaining approval, please submit a request through the request form below.

CODE NINJAS BRAND HUB

REQUEST FORM

CODE NINJAS®

OUR ENVIRONMENT

EXTERIOR SIGNAGE

Signage is an important part of Code Ninjas' brand identity, as it plays a significant role in attracting potential customers and creating a strong brand image. Consistency in branding is therefore crucial in ensuring that Code Ninjas' signage effectively communicates the brand's message and values to its target audience.

Exterior signage is included as part of the center opening package, which is handled by approved signage vendors. These vendors are experts in the field and have knowledge of Code Ninjas' branding guidelines, as well as the ADA and local ordinances and regulations. By working with these vendors, Code Ninjas can ensure that their exterior signage is not only attractive and eye-catching, but also compliant with all relevant laws and regulations. This helps to build trust with potential customers and reinforces Code Ninjas' commitment to providing high-quality services in a safe and welcoming environment.

Use the Code Ninjas logo:
The exterior signage should prominently feature the Code Ninjas logo. The logo should be large enough to be visible from a distance and should be placed in a prominent location on the signage.

Keep it simple:
The exterior signage should be simple and easy to read. The logo should have enough contrast against the background.

Ensure visibility:
The exterior signage should be designed with visibility in mind. Consider the angle at which the signage will be viewed and ensure that it is easily visible from all angles.

Consider the surroundings:
When designing the exterior signage, consider the surrounding environment. The signage should fit in with the overall look and feel of the surrounding area and should be designed to complement the architecture of the building.

Follow local regulations:
When designing and installing exterior signage, it is important to comply with local regulations and obtain any necessary permits. Ensure that the signage is installed safely and securely, and that it does not obstruct any public walkways or create any hazards.

INTERIOR SIGNAGE

Code Ninjas' interior signage are designed with the dual purpose of creating a clear and cohesive brand identity while also providing helpful information for customers. Interior signage is an integral part of the center opening package, and approved signage vendors would possess the expertise and knowledge required to execute the design during the build-out of the center. The following guidelines provide a high-level overview of the key considerations for interior signs.

Signage design:
The design of Code Ninjas' interior signage should be consistent with the overall brand identity and color scheme. All signage should be legible and easy to read, with a font size of at least 18 point. Signs should be mounted at a height that is easily visible to all customers.

Signage types:
Interior signage should include directional signs, informational signs, and promotional signs. Directional signs should help customers navigate the center, while informational signs should provide details about Code Ninjas' services, policies, and hours of operation. Promotional signs can be used to promote events or special offers.

Compliance with regulations:
All interior signage must comply with applicable regulations, such as the Americans with Disabilities Act (ADA) in the United States, and local ordinances and regulations in other countries and regions. Approved signage vendors will have the knowledge and expertise to ensure that all signage is compliant.

Placement:
The placement of signage should be strategic and intentional, with signs placed in areas where they will be most helpful to customers. For example, directional signs should be placed at intersections or other areas where customers may need guidance, while informational signs should be placed near relevant service areas.

LEGAL AND COMPLIANCE

THIRD-PARTY LOGOS AND MATERIALS

Code Ninjas recognizes and respects the intellectual property rights of others, including those of our partners, vendors, and competitors. This policy governs the use of third-party logos and materials in association with the Code Ninjas brand.

1. **Permission:** You must obtain explicit written permission from the owner of the third-party logo or material before use. This applies to all third-party logos, images, texts, or other intellectual property used in our print and digital materials, such as websites, social media, brochures, presentations, and other marketing assets.

2. **Usage Guidelines:** When granted permission to use a third-party logo or material, ensure to follow the owner's usage guidelines. These guidelines may include specific requirements regarding color, size, positioning, or other aspects of how their logo or material is displayed.

3. **Accurate Representation:** Use third-party logos and materials in a way that accurately represents the nature of our relationship with the third party. Do not imply a partnership or endorsement if one does not exist.

4. **Respect for Intellectual Property:** Do not alter or modify third-party logos or materials in any way, unless given explicit permission to do so by the owner.

5. **Removal of Third-Party Logos and Materials:** Should the owner of a third-party logo or material request its removal from our materials, comply with this request promptly and complete

For all matters related to the use of third-party logos and materials, or to seek approval for such use, please reach out to our Legal Department.

USER-GENERATED CONTENT

User-Generated Content (UGC) refers to various types of content — such as text, reviews, pictures, videos, and more — that is created by individuals rather than by Code Ninjas itself. This policy provides guidelines for the use of UGC in association with the Code Ninjas brand.

1. **Permission:** Before sharing or using UGC that displays or references Code Ninjas, its products, services, or events, obtain explicit permission from the content creator. This applies to all platforms, including but not limited to, our website, social media accounts, print materials, and digital marketing materials.

2. **Accurate Representation:** Ensure that any UGC used accurately represents our brand and our services. Do not use UGC that falsely implies a relationship, endorsement, or partnership, or that could potentially mislead or confuse.

3. **Respect for Intellectual Property:** Respect the intellectual property rights of the content creators. Do not modify or alter UGC without explicit permission from the owner.

4. **Content Guidelines:** UGC should align with Code Ninjas' values and community guidelines. Avoid using UGC that contains offensive, misleading, defamatory, or otherwise inappropriate content.

5. **Privacy:** Respect the privacy of individuals. Do not share UGC that includes personal information unless you have received explicit permission from the individual.

6. **Credits:** Always give proper credit to the content creator, and tag or mention the creator when possible and appropriate.

For any questions or concerns about the use of user-generated content, please reach out to our Legal Department.

SPONSORSHIP & PARTNERSHIP

At Code Ninjas, we are proud to collaborate with organizations that align with our mission to inspire children and young adults to learn coding and computational thinking. This section outlines our guidelines for sponsorships and partnerships.

1. **Alignment with Code Ninjas Values:** We seek to partner with organizations that uphold the same standards of excellence and shared values as Code Ninjas. This includes a commitment to quality education, integrity, respect, diversity, inclusivity, and innovation.

2. **Mutual Benefit:** Partnerships should offer mutual benefits for both parties. This can include increased visibility, access to new audiences, shared resources, and collaborative opportunities.

3. **Non-Endorsement:** Unless explicitly agreed upon, a sponsorship or partnership does not constitute an endorsement of the partner or sponsor's products, services, or views by Code Ninjas.

4. **Use of Code Ninjas Brand Assets:** Sponsors and partners may use Code Ninjas' trademarks, logos, and other brand assets only as permitted under the terms of the partnership agreement and in accordance with our brand guidelines.

5. Review and Approval: All sponsorships and partnerships, as well as the use of Code Ninjas brand assets as part of these arrangements, must be reviewed and approved by the designated Code Ninjas representative.

6. **Public Announcements:** Public announcements or communications about the sponsorship or partnership must be coordinated and mutually agreed upon by all parties involved.

7. **Compliance with Laws:** All sponsorships and partnerships must comply with all applicable laws and regulations, including those related to advertising, privacy, data protection, and intellectual property.

For more information about our sponsorship and partnership guidelines or to discuss potential opportunities, please contact our Partnerships Department.

INTELLECTUAL PROPERTY RIGHTS

Code Ninjas LLC is the owner and licensee of all intellectual property rights (including without limitation trademarks and copyrights) related to the Code Ninjas brand, its content, products, services, and all other assets. These works are protected by intellectual property laws and treaties around the world, and all such rights are reserved.

Our intellectual property includes, but is not limited to:

- Our name, "Code Ninjas"
- The Code Ninjas logo and any variants of it
- The "Code Ninjas" trademark and any variations thereof
- All related logos, product names, or service names
- All information, content, graphics, text, images, software, sound files, video files, and tags contained in our printed and digital assets

Any and all patents and trade secrets

Improper use of this intellectual property is strictly prohibited. This includes, but is not limited to:

- Unauthorized copying, reproduction, use, modification, distribution, or replication of any of our intellectual property
- The creation of derivative works from our intellectual property
- The use of our intellectual property in a way that is detrimental to Code Ninjas, our reputation, or the value of our brand
- Any commercial exploitation of our intellectual property without our prior written consent
- Any unauthorized use may result in severe civil and criminal penalties under applicable laws.

You are not permitted to use any part of our intellectual property for commercial purposes without obtaining a license to do so from us or our licensors.
